

## Objectives and activities within the project:

Year	Objective	Activitties	Acomplishment degree		
			totally	partially	unacomplished
2007	1. Elaborations the working protocol	1.1. Establish the methodologies on the work and the study of monitoring indicators	X	-	-
2008	1. Floristic, phytocenotic and bonity study of pasture ecosystems	1.1. Identification the main factors which have influence for instalation and spreading the plant species that depreciate the quality of praticol ecosystems	X	-	-
		1.2. Establish the reference data of some monitoring	X	-	-
	2. Comparative monitoring of some indicators on the work variant of experimental plots in spreading the plant species that depreciate the quality of praticol ecosystems	2.1. Establish of some indicators on the work variant of experimental plots in vegetation period	X	-	-
		2.2. Monitoring the main factors which have influence for instalation and spreading the plant species that depreciate the quality of praticol ecosystem	X	-	-
2009	1. The analysis and the complex understanding of the results obtained in the first vegetative season and the scheduling for next period	1.1. The economical analysis after the first year of researches	X	-	-
		1.2. The development of the results obtained due to the researches made	X	-	-
	2. The continue of experiments in the second vegetative season and testing the quality of soilage on experimental plots	2.1. Demonstrating and verify the stability of applicateed measures on the experimental plots in the second vegetative season	X	-	-
		2.2. The observation of the soilage's quality obtained from some experimental variants	X	-	-
