

Young researchers involvement degree:

Year	Young researches	Activities	Hours worked	Tasks accomplishment degree	Published scientific paper
2007	Popovici C-tin Iulian	Establish the methodologies on the work and the study of monitoring indicators	50	total	-
	Huma Ramona		67	total	-
2008	Popovici C-tin Iulian	Identification the main factors which have influence for instalation and spreading the plant species that depreciate the quality of praticol ecosystems	240	total	-
	Huma Ramona	Monitoring the main factors which have influence for instalation and spreading the plant species that depreciate the quality of praticol ecosystems; study the biology of some potential agents for natural limitation of main invasive plants	520	total	1
2009	Popovici C-tin Iulian	The observation of the soilage's quality obtained from some experimental variants	380	total	1
	Huma Ramona	identify some biological agents (pests) that potential natural limitative factors	740	total	2
