THE 19th CONFERENCE ON APPLIED AND INDUSTRIAL MATHEMATICS

CAIM 2010

Iași, Romania, September 22-25, 2011

FIRST ANNOUNCEMENT

The Romanian Society of Applied and Industrial Mathematics (ROMAI), “Ion Ionescu de la Brad” University of Agricultural Sciences and Veterinary Medicine of Iași (UASVM), The Academy of Romanian Scientists (ARS), the Faculty of Mathematics of the "Al. I. Cuza" University of Iași (UAIC), and the Romanian Mathematical Society – Iași branch announce the organization of the 19th Conference on Applied and Industrial Mathematics - CAIM 2011. The Conference will be held in Iași, between the 22 and the 25 of September, 2011.

ROMAI was founded in 1992. It is a non-profit scientific association whose members are mathematicians, physicists, engineers, chemists, biologists, economists, and other scientists from Romania, Republic of Moldova, and some other countries. ROMAI encourages and promotes studies on applied mathematics and organizes annually, since 1993, the Conference on Applied and Industrial Mathematics (CAIM).

Iași is the most important historical, economic, and cultural center in Northeast Romania. In this area, the archaeological researches have discovered traces of the ancient Culture of Cucuteni, flourishing about 5000 years ago. Iași City is documentary certified from the 14th century during the reign of Alexandru cel Bun. The name of Iași City is bound up with the so-called "golden period" of the Romanian culture. At the beginning of the 19th century, here was established the first high education school in Romanian.

In 1860 Al. I. Cuza, the first ruler of the United Principalities of Moldavia and Wallachia, founded in Iași the first university in Romania, later named “Al. I. Cuza” University.

In 1912, the Agricultural Science Department was set up within the Faculty of Sciences of “Al. I. Cuza” University.

Many Romanian personalities lived, studied, worked and created in Iasi.
The city is well known as a major cultural city.

Objectives

CAIM 2011 provides a forum for the review of the recent trends in theoretical, numerical, experimental and industrial applications of mathematics, in computer sciences and in education activities in mathematics. It offers to the researchers the opportunity to share new research advances and ideas in different areas of Mathematics with a special stress on their applicability. Also, it is our intention to create a framework for discussions on the interface between Mathematics and Industry.

Graduate students and postdocs interested in these rapidly developing fields are warmly welcome.

This edition is especially dedicated to researches in **quadratic dynamical systems and their applications**.

Conference Sections

1. Dynamical systems, jets theory and their applications; quadratic dynamical systems
2. Algebra and logic
3. Topology and differential geometry
4. Functional analysis and differential equations
5. Analytical and numerical methods in mechanics
6. Mathematics in Physics, Chemistry and Industry
