

Tiervermögen – ausweisung im jahresabschluss und bewertung

CERNEA Sorana Celina - USAMV Cluj-Napoca

In Germany livestock is generally not balanced as asset capital or floating capital, but in a separate item called "livestock assets". This is different in Romania, where livestock is balanced in both asset and floating capital. In both countries, livestock is valued with the cost of purchase and production costs for a farm. To facilitate the valuation specific methods are available.
