

The characterization of the segetal flora from Cotnari, Iași and Huși vineyards

C. SÎRBU - USAMV Iasi

In this paper the author presents an analysis of segetal flora from Cotnari, Iași and Huși vineyards, regarding: the vital forms, the biological groups, the genetic and ecological categories, the floristic elements, the tallness of plants, the dynamic of flowering, and the propagation of plants in the nature.
