

Aspects techniques-économiques concernant l'élevage des bovinés pour lait dans le district d.iasi

Elena GINDU, A. CHIRAN, Elena-Adina CIOBOTARU, Cornelia MURARIU – USAMV Iasi

The milch cattle breeding occupies an important..place in Iasi county, so that the cows and heifers represented 51,3 % from the total number of the cattle on the 30st April 2001. The authors proposed to emphasize some technical-economic aspects concerning the evolution of the milch cows breeding in Iasi county in the period 1997-2001, utilizing a series of specific indicators, as following : the evolution of the cattle effectives on property forms, the structure of the milch cattle effectives on breeds and property forms, the situation of the state, private and family farms of milch cows breeding, the medium, total and merchandise production, the unitar costs, the sale prices and the rentability. There are emphasized also the causes which generated the negative aspects of the evolution of the main indicators which were analysed.
