

Cercetari privind reactia ecofiziologica a vitei de vie la atacul de acarieni

TOMA Liana Doina, BADEANU Marinela, JITAREANU Carmenica Doina, NECHITA B.,
MUSTEA M., ROBU T. – USAMV Iasi

Researches were carried out on five grape varieties, namely Merlot, Riesling, Grasa de Cotnari, Tam`ioasa romaneasca and Busuioaca de Bohotin, grown in the university research unit. "Vasile Adamachi", Iasi, in 2001. The ecophysiological reaction against the attack of *Tetranychus urticae* and *Eriophyes vitis*, was analysed by means of the foliar pigment content studies.
