

SPECTRAL METHODS TO EVIDENCE PHYSICAL PROPERTIES OF THE MODEL-MEMBRANES METODE SPECTRALE PENTRU EVIDENTIEREA PROPRIETATILOR FIZICE ALE MODEL-MEMBRANE

Feride SEVERCAN - Middle East Technical University of Ankara, Turkey
Dana DORHOI - "Al.I.Cuza" University of Iasi

Spectral method used to establish physical properties of the model membranes, such as dipalmitoylphosphatidylcholine (DPPC) and dipalmitoylphosphatidylglycerol (DPPG) are discussed in order to characterize their permeability in systems DPPC/GS and DPPG/GS obtained with gramicidin S (GS).
