AGRICOLE” ASISTATĂ DE CALCULATOR
(POWER POINT)
TEACHING - LEARNING HOW & QUOT;AGRICULTURAL
TECHNOLOGIES; COMPUTER AIDED (POWER POINT)

MIHĂESCU Lenuța - Școala "Titu Maiorescu" Iași
STANCIU M. - USAMV Iași

The paper presents a modern manner of teaching (Computer Assisted Teaching by aid of PowerPoint) knowledge in the framework of “Agricultural Technologies” module studied at Technological Education classes, in the sixth grade. By means of the PC one can teach pupils the lesson „Groups of Plants” part of the learning unit „Plants growing” using techniques based on modern methods (algorithmization, programmed education, learning by means of discovery, case studies). Pupils come into contact with the new knowledge by means of palpable images and short wording, stimulating thinking and learning by discovery. The programmed forms allow the pupils a quick assimilation of the new knowledge.
