

MORPHO-PRODUCTIVE FEATURES OF OVINE ANIMALS
OF MERINO TYPE STUDIED AT THE DIDACTIC RESORT
BANU-MARACINE-CRAIOVA
CARACTERISTICI MORFO-PRODUCTIVE LA OVINE DE TIP
MERINO STUDIAȚE LA STATIA DIDACTICA
BANU-MARACINE-CRAIOVA

COLA M., GĂVAN C., COLĂ Florica - University of Craiova

The purpose of this research and study was to determine the phenotypical values of the main morphological and productive features of the ovine biological material obtained at the didactic resort Banu Maracine, Craiova.

The genofond of the ovine animals of Merino type which were studied is made up of blood belonging to the Transylvanian Merino type in a proportion of 83 % and of blood belonging to the Caucasian Merino type in a percent 17 %.
