UNGUREANU G., VASILESCU N., BREZULEANU S. - USAMV Iasi

The revenue represents the total sum of total venue registered on agricultural exploitation in respective period, became from principal period and secondary activities realised from this. The objective of each agricultural exploitation is to obtain on maximal revenue. Net income on any farm depends on several factors, but much of the differences in net income between farms can be attributed to farm size, physical efficiencies of production, economic efficiencies of production, enterpris combinations, fixed cost structure and commodity marketing
