

THE ALIEN (NONNATIVE) FLORA OF MOLDAVIA (ROMANIA) FLORA SALBATICA A MOLDOVEI

C. SÎRBU - USAMV Iasi

In this work the author presents a checklist of the alien plants of Moldavia (Romania), including xenophyte and hemerophyte (except ergasiophyte) species. The complex analysis of the alien flora is presented (historical data, immigration mode, invasive status, geographical origin, genetic, ecological, biological, phytocoenological and chorological data). The most dangerous alien species for human-made and natural habitats from Moldavia are identified.
