

Unele consideratii privind asigurarea cererii de consum la legume si cartofi (studiu de caz in comuna Beresti-Bistrita, judetul Bacau)

A.CHIRAN, Elena GINDU - USAMV Iasi
Gh. PRICOPIE, D. DORDEA - SA "Phyton" Beresti-Bistrita, Bacau

Berești-Bistrița village is located in the north of Bacău district, at 20 km north from Bacău city, on the right side of Siret river, close to the junction of Bistrița with Siret river.

The vegetables and potatoes culture occupies a surface of 386 ha from the arable surface of 4270 ha, realising an yearly vegetables and potatoes production of more than 6366 tonnes, which means 1861 kg/inhabitant.

The vegetables and potatoes represents a main product in the daily food of the Romanian people. The major purpose of the producers from this village is to ensure the consumption demand for this product.

The authors proposed to emphasize the aspects which characterize the supply with vegetables and potatoes of the population from Berești-Bistrița village, in the perspective of having the consumption rates as in the country of the European Union.
