

Euphorbia dentata și alte plante adventive, pe cale de răspândire în estul româniei

C. SÎRBU - USAMV Iași

In this paper we present new data about the spreading of some alien plants (xenophytes or hemerophytes), from the eastern part of Romania, namely: *Euphorbia dentata* Michx., *Ambrosia trifida* L., *Oxybaphus nictagineus* (Michx.) Sweet, *Erigeron annuus* (L.) Pers., *Impatiens parviflora* DC., and *Ipomoea purpurea* Roth etc. For these species we also indicate the general spreading in Romania, on the grounds of the consulted literature.
