

Agricultura in zona agroeconomica Galati: prezent si tendinte de viitor

F. M. DIMA - Institutie: O.J.C.A. Galați
A. CHIRAN, Elena GINDU - USAMV Iasi

The study is realized in the agro-economical zone of Galați which comprises a territory of 8 localities situated of the rivermeadow of Siret and Prut and on the adjoining hills. The agricultural surface of the above mentioned zone is 51.7 thousand hectares, from which the arable land represent 89.7 %, the natural grasslands represent 4.9 % and the viticultural and fruit-growing plantations represent 5.4 %.

The authors intend to analyse the present situation and the emphasize the perspectives in the context of the regulations imposed by the integration of Romania in the European Union.
