

Strategia de dezvoltare și evoluția agriculturii în județul Timiș

F. CRISTA, M. GOIAN, Laura GABOR, Nicoleta TABLE - USAMVB Timișoara

In Timis County are established some strategies on short and long term regarding agriculture and provisions industry. Those strategies mainly imply sustainable development for agro-alimentary segment. This section can become competitive by the qualitative and quantitative increase of production and by modernizing agricultural machines. Also, agro-alimentary segment can become competitive by improving the quality of food supplies products in order to guarantee alimentary security of inhabitants. After 1990, agriculture in Timiș County has been inscribed into a complex process of redesigning and restoring. During this period of time, Timis County agriculture went through many stages of increasing, slack time and diminishing. These stages were recorded even on national level. This paper specifies the main features of agriculture evolution for 1990 – 2003 time period.
