

58 de ani de existența a Bibliotecii Universității de Științe Agricole și de Medicină Veterinară din Iași

Gilda Eleonora DRAGANESCU - USAMV Iași

This paper represents a double landing of the Library's history: an objective view, counting the years from the setting up and a subjective view given by the Library's Director.

Ever since 1948, the Library has been one of the most important departments of the University. We are presenting the main moments of its evolution, touching departments organization, staff and librarianship problems. We are also making a short analyze on the actual state of things, a survey on the positive and negative points of the situation. The paper contains a diagram of the acquisition policy of the Library, which relieves the progress made within the last two years.

The author also presents some of the most important personal satisfactions given by her work as Head of the Library. These fulfillments complete a 30 years career that gives the author the right to define the librarian job: "a scrupulous and discrete labor for the survival of the lecture tradition".
