

## Un nou punct de vedere privind evaluarea terenurilor agricole, în conformitate cu resursele naturale de soluri din România

Claudia ANDREIASI, N. ANDREIASI, Irina MOISE, Liliana PANAITESCU, Daniela JITARIU, I.  
EREMIA, S. ENUTA, Liliana MIRON - Universitatea "Ovidius" Constanța

The researches represent the "fruit" of an extensive study research, made by a specialists community, who were studying the aspects regarding Romania's agrary fund quality.

The opening of agrary market in our country has marked the investors appearance; the investors were delighted by "the offer", if we mention that Romania has some of Europe's best soils.

In this study, we also made a correction about the criterions used for fields, in order to integrate them in evaluation classes; in the same time, their value expressed in currency was mentioned.

We also present tables and aspects from different locations in Romania and the way these aspects were scientifically appreciated.
