

Investigation on the evolution of main chemical and biological characteristics of soil as influenced by technological factors and soil erosion

G. JITAREANU - USAMV Iasi

C. AILINCAI, Despina AILINCAI - S.C.D.A. Podu Iloaiei

D. BUCUR, A. MERCUS - USAMV Iasi

The study of influence of environment conditions and cropping technologies on the complex of factors which act in the complex plot- weather-crop allows to elaborate efficient technological solutions for soil conservation, erosion control and pollution and soil degradation limitation.
