

Influenta furajarii timpurii cu furaj suplimentar asupra purcelului sugar

Gh. VOICU, Aurica SOARE - Universitatea "Dunarea de Jos" Galati

The research which is the object of this paper –has been intended to prove that the foddering of the sucking pigs, being 5 days old, leads to a superior breeding and development of animals, with a high economic effect. The early and very early weaning of the sucking pigs does not affect negatively their health condition.
