

Influența sistemului informațional actual asupra raționalizării distribuției produselor

PETRESCU Gh. - Universitatea de Medicină și Farmacie "Gr.T.Popa"
BOLDUREANU Gabriela - Universitatea "Petre Andrei" din Iași

Considering management in the sphere of commerce, an efficient management should be based on the following premises: rationalization of organizational structure of a commercial body, improvements in the information system, higher level of management training. The paper tries to evaluate the influence of the information system upon the rationalization of the production distribution.
