

**Outgoing student - Abed Elhadi Gehad,**

Student la: Facultatea de Medicină Veterinară

Mobilitate de studiu la: Università degli Studi di Milano, Italia

Când: Anul universitar 2021-2022

No words would describe my feelings during 2021-2022, when I literally enjoyed every single moment of my journey at the Faculty of veterinary medicine in Milan, Italy. I spent there 2 semesters, I got to know a lot of people from different countries; I explored more of the Italian culture and beauty and had the chance to travel to different places in Italy.

The professors there, including the Erasmus coordinator, treated me as one of their students, I enjoyed learning from their experiences and the knowledge they have.

After a successful year in Milan, the Erasmus coordinator there recommended me to apply for a summer traineeship at the Faculty of veterinary medicine in Camerino, Italy. There I enjoyed every single moment; it was my first time entering orthopedics surgery room & participating in performing TPLO + TTA techniques for dogs, where I absolutely learned a lot and improved my practical skills.

I really appreciate the effort of our faculty Erasmus team, thank you for this opportunity & for supporting your students: I recommend every student that would like to build new connections abroad and get to know new people to apply for the Erasmus program. This program will open for you a lot of doors that you never imagined you could open!
